

STOKER COCKPIT SETUP
 as at 24th June 2016
 with installation of Thomson Dropper Post
 (was measurements were prior to this)

Saddle is set rearward.
 The front of the 40mm
 seat post clamp is in line
 with the front "STOP"
 mark on the saddle rail.

Annette's floor to crutch = 795
 Lemond method x 0.882 = 702

The dropper post was lowered 10mm
 and the position adjusted to be the
 same as previously (dimensions in brackets)
 The dimensions are with the saddle full height
